

Risks	Assessment	Solution	Level /5
Power Cut	Result in a loss of work time and could result in work completed being less/lower than if not.	1. Find somewhere else to work 2. Wait out the power cut	5
Broken Computer	Would result in no work being able to be completed.	1. Fix computer 2. Find another workstation	5
Internet Disconnect	Version Control + Project management would be stunned (unable to upload to GitHub and unable to update Jira).	All work could still be carried out; however, a few items would need to be postponed until internet returns.	2
Eye strain	Long periods of time at a computer may result in eye strain and cause headaches.	This wouldn't result in workflow massively impacted, would just require break management.	2
Back pain	Long periods of time at a computer may result in back pain and would result in uncomfortableness while sitting at computer.	Solution similar to eye strain however the breaks may need lay down time to sooth back.	2
Timeframe	If unable to meet the timeframe to deliver all required properties of the project could result in an unfinished project.	Focus on the bare bones of the assessment first so the bare minimum is done before sprucing everything up. Also time management	4
Virus	On the event of the working device contracting an unforeseen virus, this could result in a loss of work, and a could cause a stun in workflow.	Before project clean computer out, either professionally/ via antivirus software	4
